

***On-Line Desktop to Floor model
Print to Mail Folder-Sealers***

MAILFINISHER LJ 4000

***This simple to use yet highly intelligent system
is the most cost effective on-line folder and
pressure seal system on the market.***

***Used in-line with the laser printer,
the MailFinisher LJ 4000 pressure sealer enables to cope
with the growing needs for one-piece-mailers in many
offices and mailrooms.***

Modular and compatible with an impressing number of cut sheet printers the Mailfinisher LJ 4000 (MF 4000) is ideal for all types of applications, including payroll, reminders, legal, tax and/or medical advices, salaries, Giro payment documents, registered and recommended mail, confidential PIN or login codes, and any other single page documents to be produced in small, medium or large quantities.

Exceptionally quiet, the MF 4000 is ideal for any office environment, and is fully compatible with numerous cut sheet printer models and configurations. Modular and mobile height cabinets are available -and retrofittable- to allow for additional paper trays on printer. The MF 4000 remains a compact system designed to be used by everybody, in any office, and for every possible type of mailers. It offers cost effective and very quick operations, in total confidentiality, In-line with desktop and floor model printers.

Rapid and near to operator free, this pressure sealer has simple to use features enabling drastic cost and time reduction , elimination of after-print manipulation and time , a widespread use and easy in-line production of one-piece-mailers with new, or already installed desktop or floor model printers. Additional features and accessories include a system for incorrect or double feed stationery and cabinets with shelves for extra paper trays height adaptation.

MAILFINISHER LJ4000

ACTIVA **DPS** brings to you a compact and high performance one step process to **print, fold and seal in one single operation.**

Digital Reset Counter

as standard.
Simple and easy to use operator panel.

Revolutionary Hi Tech folding unit and Manual Feed function

A simple manual feeder allows the processing of single documents. This versatile desktop sealer has an easy to reach folding area, and full access to the sealer area paper path. Fold configurations such as Z, C, V & Double Fold are done by simple settings.

Forms outside the calibrated setting will be sent to the by-pass tray : simplicity, safety and operator autonomy

An integrated imaging system detects unrecognised stationery and double fed sheets diverting them into the by-pass tray.
Safety / security "black box" covers available as option for the by-pass tray for confidential (PIN code...) jobs.

Features

Maximum paper size	(A4, letter, 12", 14", etc.)	Re-settable total and batch counter	Standard
Paper weights	70 to 140 g / m ² (110 to 130 g/m ² recommended for pressure sealing)	Convenient and easy to reach fold area and stacker. Settings changed in seconds	Standard
Weight and volume	46 kilos / 580 x 400 x 380 mm	Double sheet / paper thickness detection	Standard
Feeder capacity	dependant on number of paper trays on printer	Manual Feeder	Standard
